SPRAYING STOPS WORK OF WORMS KAFIR IS BES

Experiments at State College Show Results Obtained in Two Years.

what is known as the 'cally agray' on apples. The flarilett pear does not close its cally as do most of the apples. The account sursying was given on May 21, and the third on Jame 15. tained in Two Years.

State College, N. M. April 12.—Directions for spraying pear trees, the kind of spray best suffed for the southwest and the results of apraying experiments are dealt with fully in a bolletin issues by Pref. Pabian Garcia of the New Mexico State college. Prof. Garcia says:

New Mexico State course.

"During the senson of 1915, three different apraying experiments with the pear wers conducted. First, three apraying with the Harliett, to test the early apraying that corresponds to what is known as the calva speny on the apple; in the second experiment this 'calva speny' was omitted; the thirst experiment was tried with the Winter Nells pear without the 'calva spray.'

"The Bartlett pear in 1915 was re-corded in full bloom on April 2. On April 28 the first suray was applied; this is the one that corresponds to

OF PIMPLES

On Limb. Hard and Large. Terrible Pain at Night. Could Not Sleep. Inside of a Month

HEALED BY CUTICURA SOAP AND OINTMENT

"My left limb, from the ankle halfway up on one side, broke out with pimples which were hard and large. The fiching of these pimples was terrible and at times I would scratch until I made them bleed. They then started to get red and inflamed and my limb was swollen. I had a terrible pain besides the fiching, and at night I could not sleep. I had to keep my limb ban-

daged all the time. "Then I tried Cuticura Soap and Ointcut. I washed the affected parts with the Cuticura Soap and applied the Obstment twice a day and I was healed inside of a month." (Signod) Miss M. Sintery, 1200 Bourton St., New Orleans, La., July 22, 15.

LITTLE LIVER PILLS

and the third on June 15.

Pears 90.43 Per Cent Sound.

"On August 6 the fruit was picked from the seven survayed trees. The foral number of pears produced by these seven trees was 4.087. Out of this number there were 5.035 sound and 251 wormy pears; or 90.12 per cent sound, and 2.57 per cent wormy.

"In the second experiment, in which the first spraying, corresponding to the calvx sirray," was unitted, there were three trees sprayed on May 21, June 15, and July 1.

periment were bot quite as good as in the first. The results with the 'calyx' spray' save 4.85 per cent more sound fruit.

Four Hartieft trees were used as checks. These were harvested on August 6, producing 2,019 pears. There were \$26 sected and 2,021 wormy; or 27,09 per cent accumit and 2,021 wormy; or 27,09 per cent accumit and 7,161 per cent worms. Thus it is seen that the three sprayings with the 'calyx spray' gave \$3,04 per cent more sound fruit than the check trees, while the three sprayings without the 'calyx spray' save 5,19 per cent more sound fruit.

"In the spraying of the Winter Nelis the calyx spray' was omitted. The trees were sprayed on May 21, June 15, July 1, and July 27. On October 2; the fruit was gathered and out of 692 pears produced by the three trees, \$70 were sound pears and 318 per cent wormy. The check Winter Nelis trees produced 120 sound pears and 318 per cent wormy. The check Winter Nelis trees produced 120 sound pears and 31 wormy ones, or \$7,74 per cent sound and 18,28 per cent wormy. The comparatively large per cent of sound fruit on the check trees would indicate that the Winter Nelis hear is not so susceptible as the Bartiett to injury from the coolling moth.

Kind of Spray Used.

"The powdered form of arsenate of lead was used, at the rate of 1 1-2 pound to 50 gallons of water. The first spraying was applied with the Bordeaux normic, and was comparatively course. In the subsequent synayings the Vermorel norme was used in this experiment.

"Toring the summer of 1914, four Barlett pear trees were sprayed on April 22 May 15, June 15, and July 10. Thus trough and 1150 pears. There were 1148 sound and 116 wormy, or 56.2 per cent sound.

"The result of those two years' experiments in spraying the Barliet; year show that spraying will reduce very materially the percentage of wormy fruit.

MANY TRANSFERS AND ASSIGNMENTS ANNOUNCED

ASSIGNMENTS ANNOUNCED

Infantry and cavelry transfers and assignments are the feature of the army orders. The orders follow:
Transfers and assignments: Maj. Charles R. Hagadorn, 23d to Fifth Infantry, June 1: Capt. Biohard W. Wallot, 12th to Night cavelry, June 25; George R. Pritchard, ir., Tanth to 15th cavelry, June 21; Theodors R. Taylor, Fifth to Fourth cavelry, June 2; John B. Hobertel, 11th to 15th infantry, June 6; first Hestemants Oliver A. Dickinson, infantry, to 15th Infantry, June 16; Auguster, 14th to 15th infantry, June 18; Patrick J. Morrissey, attached to Third infantry, is assigned to 13th infantry, June 15; Patrick J. Morrissey, attached to Third infantry, is assigned to 13th infantry, June 15; Patrick J. Morrissey, attached to Third infantry, is assigned to 13th Infantry, June 15; John B. Johnson, Third to Ninth cavelry, June 21; clarence H. Isanicleon, 58th to 27th infantry, June 2. Clarence H. Isanicleon, 58th to 27th infantry, June 5; John B. Javin, Tenth to Fourth cavelry, June 5. John B. Javin, Tenth to Fourth cavelry, June 6. Leave, Capt. John B. Fair, quartermaster

June 8, Jerome W. Howe, Tenth to Fourth cavairy, June 6.

FOR SOUTHWEST

Agricultural Expert Tells of Inmates of Old Reservation Crops That Are Best Suited to Southwest.

warm methods that are practiced.

The dependable corn crops for the southwest are the grain sorghums such as kafir, mile and feterits. It is true that indian corn does produce good crops, some years, and is a fine crop to handle and feed. It is a crop that was perhaps a leader in the state or focality from which you, as a farmer, came and it may appear to be a hard matter to get along without it. But successful farmers of the southwest do not 'pin their failth' to corn, they often plant a small acreage and are not dependent too much upon it. The very successful own crop of 1915, throughout the southwest, may be a corn year long to be remembered.

Dwarf Kafir Dependable.

Dwarf Kafir Dependable.

"Dwarf kafir is one of the most dependable grain, fodder and sliage crops known for limited rainfall conditions. This dwarf variety matures in fully 26 days leas time than the common kafir and can be depended upon to produce fodder and some grain, even during the driest years, if good cultural methods are adapted. Some of this dwarf kafir should be planted on every farm every year.

"The red or yellow dwarf milo, sometimes called the dry farmer's friend," will make grain and fodder overy year. At least one-third of the acreage planted to the grain surghums on each farm should be of this crop. The standard red milo is not as dependable as the dwarf milo.

Feierita a Dry Year Crop. Dwarf Enfir Dependable.

"Feterita a Dry Year Crop.

"Feterita is strictly a dry year crop and does not make the showing during good years, of kafir or milo. But on account of its extreme drouth resisting qualities, every southwestern farmer should plant some of it every year. Like milo, one-third of the acreage planted to the grain sorghums should be of feterita. Feterita makes an excellent grain crop, about equal to kafir or milo, but the fodder is not as good as kafir.

"For exctions of limited rainfall, mudan grass promises to be the best poeture and hay crop. This crop is a long and dairy cows or as a hay most proposed and dairy cows or as a hay most proposed and dairy cows or as a hay most proposed and dairy cows or as a hay most proposed and dairy cows or as a hay most proposed and dairy cows or as a hay most proposed and dairy cows or as a hay most proposed and dairy cows or as a hay most proposed and all clauses and the specially when moisture is limited.

"Some of the most deprisable beans."

Some of the most deprisable beans for limited rainfall conditions are the New Mexico Pinto and the California Brown varieties, both of which are good yielders and have excellent market demands. From 100 to 800 pounds and the California Brown varieties, and have excellent market demands. From 100 to 800 pounds and the california Brown varieties, and have excellent market demands. From 100 to 800 pounds and the california Brown varieties, and have excellent market demands. From 100 to 800 pounds and the california Brown varieties, and have excellent market demands. From 100 to 800 pounds and the california Brown varieties, and have excellent market demands. From 100 to 800 pounds and the california Brown varieties, and have excellent market demands. Feierlin a Dry Year Crop.

tion Must Remain South of That Street.

If women who were former occupents of the rentricted district intend to remain in El Paso, they must live below Eighth street, according to a ruling of ludge Paul Thomas of the corporation court, Wednesday aftermoon, following the placing of a 25-time against Makel Stanley, arraigned on a charge of vagrancy.

A warning against taking up her residence in the residence district was also issued by judge Thomas to the defendant. Derothy Mytleve, arrested in company with the Stanley woman, was assessed a fine of \$10, on a vagrancy charge, while G E. Monow, proprietor of a hotel on Overland street, was told by judge Thomas that former residents of the restricted district could not be allowed in his place.

Morphine Seized.

trict could not be allowed in his place.

A quantity of morphine was introduced as evidence by officer James Arrundiell, in the case of W. H. Rannister, atreated Tuesday night on a vagrancy charge, at Second and Sandacinto streate, at Second and Sandacinto streate, according to the ientimony of the officer Bannister, had the drug in his possession when taken into custody. The prohibited drug was confiscated by the police, and Bannister was remanded to juil.

Rede But Did Not Pay.

In default of funds to settle an automobile hill of \$12. T. W. Scott was assessed a fine of \$5 by judge Thomas. According to the testimony of the driver of a public service car. Scott engaged his car Tuesday afternoon for several hours and when the time came to settle for its services, he did not have the money. Scott testiffed that he endeavored to obtain the money and had used the car seems anditional time in an effort to get it from friends in the contents.

Card of Thanks.

We wish to thank our friends for their kindness during the Illness and death of our sister, Mrs. Catherine Allin.

Mr. and Mrs. Joseph Seeger.

and beautiful.

Thin, brittle, colorless and acraggy hair is mute evidence of a neglected scalp; of dandruff—that awful scurf. There is nothing so destructive to the hair as dandruff. It robs the hair of its instre, its strength and its very life; eventually producing a feverishness and itching of the scalp, which if not remedied causes the hair roots to shrink, loosen and die—then the hair falls out fast. A little Danderine tonight—now—any time—will surely save your hair.

Get a 25-cent bottle of Knowlton's Danderine from any drug store or tolict counter, and after the first application your hair will take on that life, lustre and luxurance which is so beautiful. It will become wavy and fuffy and have the appearance of abundance, an incomparable gloss and softhessis but what will please you most will be after just a few weeks use, when you will actually see a lot of fine, downy hair—new hair—growing all over the scalp.

Danderine is fo the hair what fresh showers of rain and sunshine are to vesetation. Goes right to the roots, invisorates and strengthens them. Its exhilarating and life-producing properties cause the hair to grow long, strong and heautiful.—Adv.
